## DETAILED ACTION

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claim could either not be found or was not suggested in the prior art of record. The subject matter not found was a method of infusing fluid in an implantable drug pump with a reservoir, flow restrictor and a valve. During this method, fluid is transmitted through the flow restrictor to limit the flow as well as determining the transient pressure differential relative to the flow restrictor to determine if an occlusion is present and the location of the occlusion. The transient pressure differential is determined by measuring the pressure at two different locations as a function of time and wherein the two locations are upstream the flow restrictor and downstream the flow restrictor, so the user can accurately determine the location of the occlusion.

The independent claims also include other patentable subject matter in combination with the other elements or steps of the claim not mention in the above paragraph.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew F. DeSanto whose telephone number is 571-272-4957. The examiner can normally be reached on Monday-Friday 9:30-6:00.
